Partners

Thank you for your time

Customer Testimonial

“Innovative network applications from **Ci2i** has empowered our business to move with the times.”

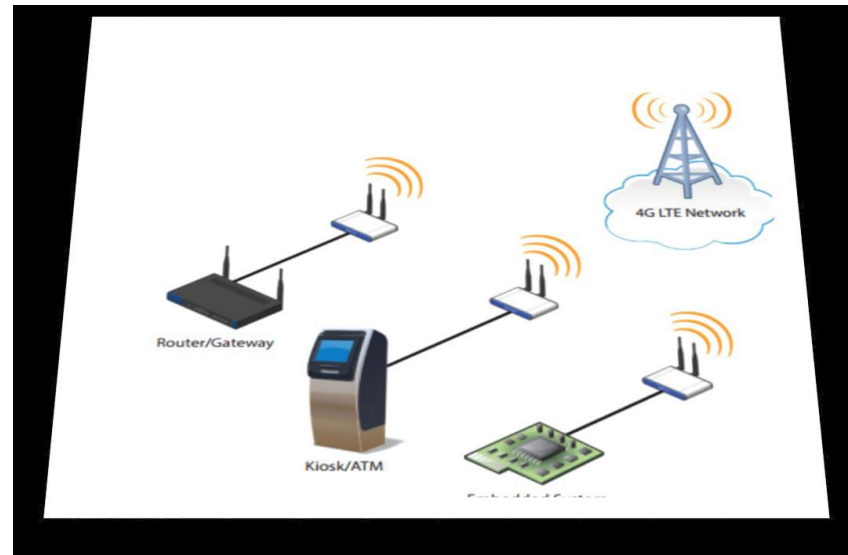

QUENTIN H: SOLUTION MANAGER

Appendix

ATM & POS

- ▶ Plug and play
- ▶ No need for a separate power connection because we connect via USB
- ▶ Wireless networking is no longer an outlier; it has simply become another tool in the network designer's arsenal
- ▶ Easy, flat monthly payment term including hardware and unlimited data plans

Remote Tank Monitoring

- ▶ Secure wireless communication – **cellular or point-to-point radio**
- ▶ Liquid level sensing using a variety of gauges depending on application: **float, pressure, differential pressure, ultrasonic, etc.**
- ▶ **Monitoring/control** of existing tank diagnostic systems
- ▶ Bidirectional communication for **data collection, control, and over-network updates**
- ▶ Variety of communication schemes supported: **text message, email, internet, cloud, cell phone/tablet/PC**
- ▶ **Low-power** – battery, solar power options
- ▶ **Industrial grade, ruggedized platform**
- ▶ **Simple, low-cost, monthly rate** includes hardware & services

Transport Asset Management

- ▶ **Monitoring & Control with Cellular Communications**
 - ▶ **Monitor** temperature, humidity, access, location, etc.
 - ▶ **Control** alarm settings, system on/off, etc.
 - ▶ Optional satellite communications – maintain data transmission when out of cellular network range

Marine Asset Management

- ▶ **Monitoring & Control with Cellular & Short-Range Communications**
 - ▶ **Monitor** temperature, humidity, access, location, etc.
 - ▶ **Control** alarm settings, system on/off, etc.
 - ▶ Short-range wireless communication (Zigbee, Wi-Fi, etc.) on barge and to/from tugboat
 - ▶ Optional satellite communications – maintain data transmission when out of cellular network range
